EXPERIENCE

TaxConsultGuru Pvt. Ltd - Full Stack Developer (Freelance)

March 2026 - Present

- Developed a B2B2C service marketplace with a 3-tier RBAC system, reducing manual onboarding time by ~70%.
- Engineered secure communication and authentication workflows using OTP and PII masking, improving platform security and reducing unauthorized interactions by ~50%.

NullClass EDTECH Pvt. Ltd – Full Stack Development Intern

June 2025 - August 2025

- Architected backend for video streaming, optimizing API response for seamless data delivery and low-latency playback.
- Engineered scalable REST APIs for real-time chat using Node.js & Socket.io, handling concurrent users reliably.

PROJECTS

QuickRuit AI – Node, FastAPI, Redis, BullMQ, OpenCV, Firebase, Cloudinary [Github](#) | [Live](#)

An intelligent recruitment automation system that reduces screening time by 70% via AI-driven "Best Fit" candidate analysis.

- Implemented a scalable **microservices architecture** using **Node.js** and **Python (FastAPI)**, enabling efficient separation of services and improved system modularity.
- Designed asynchronous task processing using **Redis** and **BullMQ**, improving background job efficiency and **reducing response latency by ~30%**.
- Developed real-time proctoring system using **WebRTC** and **WebSockets**, enabling live monitoring and **handling 200+ concurrent interview** sessions with stable performance.

GitTogether – TypeScript, Express, MongoDB, Socket.io, Gemini AI, Firebase [Github](#) | [Live](#)

An AI-powered hackathon squad builder that automates teammate discovery and collaboration agreements.

- Engineered a **"Zero-Click" Onboarding system** using **Gemini 2.5 Flash** to parse PDF resumes and auto-extract technical skills, reducing user profile setup time by **90%**.
- Developed a **low-latency (<200ms) collaboration engine** using **Socket.io**, handling concurrent user updates similar to Google Docs. Optimized state management for real-time synchronization.

Ashvaan – React, PostgreSQL, Supabase AI, Tailwind CSS, OpenAI API [Github](#) | [Live](#)

A student-centric companion platform focused on emotional well-being, habit building, and productivity.

- Built an **AI-driven chat assistant** using **OpenAI API** to provide personalized emotional support and daily motivation.
- Integrated smart reminders, peer-connection features, and **secure authentication** using **Supabase backend**.
