

QuickRuit AI Pricing

Built for Modern HR Teams, Startups & Campus Hiring

QuickRuit AI is designed around one simple idea:

Automate the first round of hiring so recruiters can focus on final decisions, not repetitive screening.

Instead of charging companies for bloated ATS software or forcing long-term contracts, QuickRuit uses a transparent, usage-based pricing model built specifically for modern AI-powered recruitment.

HR & Company Hiring Plans

- White-Label College Branding
- Multi-Recruiter Access
- ERP/API Integrations
- Annual Placement Analytics
- Dedicated Account Manager
- SLA & Guaranteed Uptime
- Placement Team Training Sessions

Why the Pricing Model Works

Most hiring platforms charge companies monthly even if they barely hire.

QuickRuit is different.

- ✓ Companies pay based on actual hiring activity
- ✓ Startups can begin with almost zero risk
- ✓ Recruiters avoid wasting hours on repetitive first rounds
- ✓ Colleges get predictable drive-based pricing
- ✓ AI handles screening while humans handle final decisions

The Real Value

Most companies interview dozens of candidates just to hire one person.

With QuickRuit:

- AI handles repetitive first-round interviews
- Recruiters focus only on shortlisted talent
- Hiring becomes faster, scalable, and more data-driven

One bad hire can cost ₹50,000+.

A smarter hiring process costs far less.

QuickRuit AI

Automating the first round of hiring — intelligently.
