The Hiring Gap No One is Solving Properly

These are the real business challenges that slow hiring teams down, weaken candidate quality, and create avoidable risk.

30+ Hours Wasted

Recruiters spend 20–30 hours manually screening candidates for a single role, time that could be spent on strategic hiring decisions.

Source: SHRM India Hiring Trends Report, LinkedIn Recruiter Survey 2024

80% Misfit Rate

Out of 100 applications, only 20 are relevant. Yet 100% of human time goes into reviewing all 100 resumes before identifying qualified candidates.

Source: Indeed India JobSpeak Report

Inconsistent Evaluation

Different interviewers often score candidates differently, making decisions harder to compare and justify.

Source: SHRM Hiring Practices Survey, Interview consistency studies

The Volume Crisis

A single job post in India gets 500+ resumes. Traditional ATS systems just store the chaos—they don't evaluate or prioritize it effectively.

Source: Naukri.com JobSpeak 2024, Indeed India hiring data

Misleading Resumes

1 in 8 resumes contain false claims. Traditional systems cannot properly verify candidate credentials, leaving teams exposed to hiring risk.

Source: HireRight Background Check Report, Resume fraud statistics

QuickRuit solves all 5 problems with AI-first automation, explainable scoring, and instant candidate verification.

AI Handles the First Round. Humans Handle the Final.

QuickRuit replaces the most expensive bottleneck in recruitment with an automated engine that screens, interviews, and ranks candidates before a recruiter opens a single email.

01

Post the Job

Share your opening with candidates through any channel

02

AI Parses Resumes

Intelligent screening matches skills and experience automatically

03

Async Video Interviews

Candidates interview 24/7 on any device with AI evaluation

04

AI Scores & Ranks

Explainable scores based on skills, communication, and behavioral signals

05

Humans Interview Top 5%

Recruiters only engage with pre-qualified, high-potential candidates

Smarter Hiring. Better Decisions.
Built for India. Built for the Future.

Why India. Why Now.

The \$180M Immediate Opportunity

12M+

New Job Applications

Registered annually across India's job boards
and hiring platforms

95%

Manual Screening

Most Indian companies still rely heavily on
manual first-round screening workflows

\$180M

Target Market

\$180M USD addressable market for first-round
automation platforms in India's SME and
campus hiring segment

Global HR Tech market exceeds **\$43B in 2025** and is growing rapidly toward **\$69B+** by 2033 at roughly **9% CAGR**. India adds 12M+ new job applications annually across platforms. Most Indian companies still depend on manual screening workflows, creating urgent demand for intelligent automation at scale.

What We've Built & Why It's Actually Better

Async AI Video Interviews

Candidates interview 24/7 on any device. AI evaluates communication, clarity, and behavioral signals with explainable scoring.

Intelligent Skill Screening

Explainable AI scores based on actual skills and GitHub/portfolio validation, not just keyword matching or resume parsing.

Deep Insight Scorecards

Question-by-question analysis and executive summaries for every candidate—no "black box" AI decisions.

Campus Drive Mode

PIN-protected custom drives built to evaluate 500+ college students simultaneously with automated scoring and TPO reports.

More Built-In Hiring Automation Features

✓ No Scheduling Headache	✓ Email Automation
✓ Aptitude Assessments	✓ Shareable Interview Links

 **Feature Scope**
AI automation, scoring, ranking, explainability, and campus workflows in one platform.

 **QuickRuit AI**
Complete solution for India-first, high-volume recruiting with automation built in.

 **Enterprise AI Platforms**
Strong for async interviews and scoring, but limited on India pricing and campus hiring.

 **Traditional ATS**
Great for workflow management, but not designed for first-round AI automation.

Investor Insight

Global hiring platforms validate the demand for AI-driven recruitment. QuickRuit differentiates itself by focusing on India's high-volume hiring ecosystem with affordable, scalable, and automation-first workflows.

How We Acquire Users

01

Product-Led Growth

Free pilot drives viral adoption.
Companies see ROI on first 20 candidates
and buy credits.

02

B2B Outreach

Direct targeting of HR heads and founders
at Indian startups (Seed to Series B).

03

TPO Partnerships

Partnering with university placement cells
to make QuickRuit standard for campus
drives.

Where We Are

Current Stage

Beta Ready, Seeking First Customers

We have a fully functional product, we've validated it through testing, and we're now focused on converting early interest into paying customers.

What's Done

✔ Product Built

- AI screening engine
- Async video interview system
- Explainable scoring & ranking
- Campus drive mode
- Fully functional and tested

✔ Internal Testing Done

- 100+ test evaluations completed
- AI accuracy validated
- Product-market fit signals confirmed
- Ready for customer deployment

✔ Outreach Started

- Active conversations with 10+ HR teams
- Startup founder discussions ongoing
- Campus TPO partnerships in discussion
- Early interest validated

What's Next

🚀 First Paying Customer

- Target: Within 30 days of funding
- Pipeline: 5+ qualified leads ready to convert
- Success metric: ₹5K-10K MRR from first customer

🚀 Campus Drive Partnerships

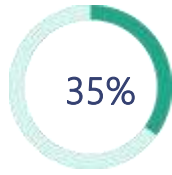

- First TPO partnership in advanced discussions
- Target: 2-3 confirmed partnerships within 60 days
- Scale: 500+ candidate evaluations per drive

The Ask

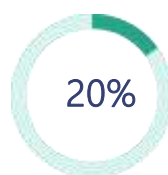

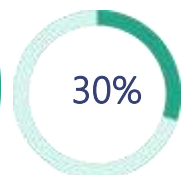

Raising **₹25-50 Lakhs** (Seed/Pre-Seed) at 5-8% equity.

The Goal

12-month goal: **₹5L+ MRR**
